TGaS Advisors, a division of Trinity Life Sciences, is pleased to introduce our second annual Digital Marketing Competency Report. The 2022 report provides a ranking of 160+ Rx brands in the pharmaceutical industry based on their omnichannel performance. As the leading provider of benchmarking and advisory services in the life sciences industry, TGaS created this report to provide our network members with an objective assessment of their omnichannel performance and a roadmap for achieving executional excellence.

Overview and Methodology	3

Video Hosting and Streaming	12
Trends	13

Overview and Methodology

Navigating the MarTech Jungle: An In-Depth Analysis of The Technology Powering 160+ Pharma Brands Included in the 2022 TGaS Digital Marketing Competency Report.

In today's hyperconnected digital landscape, the marketing technology (MarTech) space has exploded into a complex ecosystem of over 10,000 potential vendors and services. The sheer volume of available options presents opportunities for pharmaceutical brands to optimize their performance and gain a competitive advantage.

In this whitepaper, TGaS has meticulously reviewed the technology behind 160+ patient websites to understand which tools are leading in their respective categories and identify trends across brands and companies. By analyzing the vast array of platforms and solutions, our study reveals patterns and insights that will shape the future of pharmaceutical marketing. Moreover, our examination highlights emerging innovations to monitor and new offerings that become integrated within the larger cloud ecosystems. Equipped with this knowledge, pharmaceutical companies can inform internal decisions about their current MarTech stack and validate how others operate across the industry.

TGaS conducted research to identify the use of technology through tracking pixels and cookies firing on sites. The study has some minor limitations, as a site could leverage technology but omit its tracking pixel, a smaller advertising company may piggyback off a more widely integrated technology, or there are cases where a lack of tag hygiene leads to us counting technology that is no longer utilized. However, TGaS is highly confident in the findings and analysis regarding how the industry uses MarTech to drive enhanced customer engagement for the near future.

To standardize the classification of the vast array of technologies, TGaS utilized the website www.martechmap.com as a guide to organizing the technology identified in our research into categories. Given that media partners often offer multiple capabilities, we were able to rely on credible resources within the MarTech landscape and utilize our expertise to refine categories where appropriate further.

TGaS' assessment provides accurate insight and analysis that will assist companies in developing and maintaining their MarTech roadmap.

Top MarTech and AdTech Utilized Across the Industry

Marketing/Advertising Technology	Brand Utilization (N=162)
Google Universal Analytics	82%
DoubleClick Floodlight	76%
Facebook Pixel	75%

Adobe Advertising Cloud	27%
Facebook Social Plugins	27%
Adobe Analytics	25%
Adobe Cloud ID Service	25%
Adobe Typekit	23%
Adobe Launch	23%

Website Analytics

G4 Migration in 2023 and Rise of Adobe Analytics

In the past, a few options and web analytics tools often required little deliberation; however, there has been a noticeable shift in the landscape. With the transition from Google Analytics' Universal Analytics (UA) to GA4 and the rise in Adobe Analytics, pharmaceutical companies are

exploring new options and tools to better understand their website performance and user behavior. This shift is driven by the need for more comprehensive and accurate data, as well as the desire for more advanced analytics capabilities.

Pharmaceutical companies are increasingly turning to Adobe Analytics as a leading alternative to Google Analytics. Adobe Analytics offers a more robust set of features, including advanced segmentation, attribution modeling, and integration with other marketing tools. This makes it a more powerful tool for understanding the customer journey and optimizing marketing campaigns.

The migration to GA4 and the rise of Adobe Analytics are expected to continue in 2023 and beyond. As pharmaceutical companies seek to improve their digital marketing performance, they will continue to explore new tools and strategies to gain a deeper understanding of their website and users.

Advertising Technology (AdTech)

Adobe AdTech and pharma-specific programmatic vendors growing market share.

Google and Microsoft, unsurprisingly, account for four of the top ten most utilized advertising technologies, recognized for their robust paid search and display capabilities. Adobe's role in the AdTech stack across the pharmaceutical industry is strengthening, following the trend

Consent Management and Cookie Compliance

OneTrust Far Exceeds Competition in Market Share

Consent management and cookie compliance tools ensure organizations adhere to evolving global privacy regulations regarding their respective websites and personal data usage.

The market for consent management and cookie compliance tools is growing rapidly as organizations seek to ensure compliance with global privacy regulations. OneTrust has emerged as the market leader, far exceeding its competition in market share. This is due to its comprehensive suite of tools, including consent management, cookie consent, and data subject access request (DSAR) management. OneTrust's user-friendly interface and robust reporting capabilities have made it a popular choice for organizations of all sizes. Its market share is expected to continue to grow as more organizations prioritize privacy and data protection.
